

MD MAHABUBUR RAHMAN

Full-Stack Developer · Cybersecurity Engineer · Penetration Tester · ML Engineer

📍 Dhaka, Bangladesh | 📞 01715044575 | ✉️ rahmanmdmahabubur666@gmail.com
🌐 linkedin.com/in/md-mahabubur-rahman-41674b33a | 🐙 github.com/MAHABUB122003 | 🌐 mahabubur.vercel.app

PROFESSIONAL PROFILE

Innovative **Full-Stack Developer**, **Cybersecurity Engineer**, **Penetration Tester**, and **Machine Learning Engineer** with expertise spanning **Red Team (Offensive)** and **Blue Team (Defensive)** security operations. Specialized in **WordPress security**, **malware removal**, and **SEO spam cleanup** with a proven track record of recovering and hardening compromised websites. Proficient in building scalable, secure applications using **MongoDB**, **Express**, **React**, **Node.js**, and **FastAPI** with **Secure SDLC** principles. Advanced proficiency in **Machine Learning** and **Data Science**, specializing in **supervised learning**, **ensemble methods**, **feature engineering**, and **predictive modeling**. Experienced in vulnerability assessment, penetration testing, SIEM implementation, and digital forensics. Passionate about architecting **AI-powered security solutions** for next-generation threat detection and mitigation.

TECHNICAL EXPERTISE

Full-Stack Development	MongoDB, Express.js, React, Node.js, FastAPI, JavaScript (ES6+), Tailwind CSS, REST APIs, JWT, Docker.
Offensive Security	Web/API/Network Penetration Testing, Active Directory Assessment, Privilege Escalation, Exploit Validation, Pivoting, MITM, Phishing Simulation, Social Engineering, CVE Research.
Security Tooling	Burp Suite, Nmap, Nessus, Qualys, Metasploit, Kali Linux; OWASP Top 10 & WSTG, PTES methodologies.
Blue Team & SOC	SIEM (Splunk, Wazuh), EDR, IDS/IPS (Snort), Wireshark, YARA, Threat Intelligence, Incident Response, Network Traffic Analysis.
Forensics & Malware	Autopsy, Static/Dynamic & PHP Malware Analysis, File System & Browser Artifact Forensics, Web Shell/Backdoor Investigation.
WordPress Security	Malware Removal, Backdoor/Web Shell Cleanup, Database Sanitization, SEO Spam Removal, Firewall & File Permission Hardening, Core/Plugin/Theme Integrity Checks.
Machine Learning	XGBoost, CatBoost, LightGBM, Random Forest, Decision Trees, SVM, Logistic Regression, Linear Regression, KNN, Naïve Bayes.
Feature Engineering	TF-IDF, Count Vectorization, PCA, Feature Selection, Dimensionality Reduction, One-Hot Encoding, Standardization, Normalization.
Model Optimization	GridSearchCV, RandomizedSearchCV, Cross-Validation, Hyperparameter Tuning, Ensemble Methods (Bagging, Boosting, Stacking).
Evaluation Metrics	Accuracy, Precision, Recall, F1-Score, ROC-AUC, Confusion Matrix, MSE, R-Squared.
Data Science	Python, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, EDA, Data Visualization, Statistical Analysis.
Programming	Python, Bash, PowerShell, JavaScript, PHP, SQL.
Systems & Networking	Linux, Windows, TCP/IP, DNS, HTTP/S, SSL/TLS, AuthN/AuthZ, Active Directory Fundamentals.
Security Reporting	Vulnerability Documentation, Risk Assessment, CVSS-Based Severity Rating, Remediation Recommendations, Technical Report Writing.

WORDPRESS SECURITY & MALWARE REMOVAL

End-to-end detection, cleaning, recovery, and hardening of compromised WordPress websites.

- **Malware Removal:** Scanning, backdoor/web-shell removal, PHP malware analysis, infected plugin/theme cleanup, database cleanup, and malicious redirect/phishing removal.
- **Security Hardening:** Plugin/theme security review, security headers, firewall configuration, file permission hardening, and post-cleanup verification.
- **SEO Spam Cleanup:** Japanese/pharma spam removal, hacked URL cleanup, cloaked content detection, injected link removal, and Google Search Console recovery.

KEY PROJECTS

WordPress Security & Malware Removal Services

- End-to-end WordPress security: malware detection, removal, and complete site recovery.
- Clean infected databases, remove backdoors, web-shells, and malicious redirects.
- SEO spam cleanup: Japanese spam, pharma spam, and cloaked content removal.
- Hardening: firewall config, security headers, file permissions, and plugin/theme reviews.
- Google Search Console hacked-site recovery and post-cleanup verification.

MDefender Pro – AI-Powered Malware Detection & WAF

- Designed an AI-powered security platform for WordPress malware detection and web application protection.
- Integrated **machine learning-based malware detection** with real-time scanning, REST APIs, and automated threat classification.
- Implemented file integrity monitoring, license management, secure authentication, and OWASP Top 10 protection.
- Tech Stack: **Python (FastAPI), React.js, Node.js, MongoDB, Docker, Scikit-learn**.

Machine Learning for Cybersecurity

- Developed and benchmarked classification models including **XGBoost, CatBoost, LightGBM, Random Forest, SVM, and Logistic Regression** for malware and phishing detection.
- Applied **TF-IDF vectorization** and feature engineering for malicious URL/text classification.
- Conducted **EDA** using Pandas, NumPy, and Matplotlib; optimized models via **GridSearchCV** and cross-validation.

Secure Full-Stack Web Application

- Built a secure application using **React.js, Node.js, Express.js, and MongoDB** with JWT authentication, Bcrypt hashing, and RBAC.
- Applied OWASP Top 10 security controls and conducted testing using **Burp Suite** and **OWASP ZAP**.

Enterprise Red Team vs. Blue Team Lab

- Deployed an enterprise lab with **Windows Server AD, Wazuh SIEM, and Splunk**.
- Simulated attacks: phishing, privilege escalation, lateral movement, and domain compromise.
- Developed detection rules and conducted forensic investigations using **Autopsy**.

Malware Analysis & Detection Engineering

- Analyzed **RATs, Keyloggers, Web Shells, and Backdoors** in isolated environments.
- Authored **YARA** and **Snort** rules; documented IOCs and mitigation strategies.

EDUCATION

B.Sc. in Computer Science & Engineering

Expected 2026

Shanto Mariam University of Creative Technology, Dhaka

Relevant Coursework: Network Security, Cryptography, Secure SDLC, Digital Forensics, Machine Learning, Data Science, Statistics

CERTIFICATIONS & ACHIEVEMENTS

- 🏆 **Udemy:** WordPress Security & Malware Removal Certification
- 🏆 **PortSwigger:** Web Security Academy Practitioner
- 🏆 **TryHackMe:** Active Directory, Network Pentesting, Privilege Escalation
- 🏆 **Bug Bounty Hunter:** Active vulnerability researcher
- 🏆 **ML Practitioner:** Scikit-learn, XGBoost, CatBoost, LightGBM, Pandas, NumPy, Matplotlib
- 🏆 **CTF Competitor:** Web, Binary Exploitation, Forensics
- 🏆 **WordPress Security Specialist:** Malware removal, SEO spam cleanup, site hardening
