

MD MAHABUBUR RAHMAN

FULL-STACK DEVELOPER & CYBERSECURITY SPECIALIST

📍 Dhaka, Bangladesh | 📞 01715044575 | ✉️ rahmanmdmahabubur666@gmail.com
🌐 linkedin.com/in/md-mahabubur-rahman | 🐙 github.com/MAHABUB122003

PROFESSIONAL PROFILE

Dynamic **Full-Stack Developer** and **Cybersecurity Expert** with a comprehensive background in both **Red Team (Offensive)** and **Blue Team (Defensive)** operations. Highly proficient in building scalable applications using **MongoDB, Express, React, and Node.js** with a deep focus on **Secure SDLC**. Expert in identifying critical vulnerabilities through Kernel exploits, Active Directory penetration testing, and digital forensics, while capable of engineering robust defense systems using SIEM (Splunk/Wazuh) and custom IDS signatures.

TECHNICAL EXPERTISE

Development	MongoDB, Express.js, React, Node.js , JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, REST APIs, JWT Authentication.
Offensive Security	White/Black/Box Pentesting, AD Exploitation, Privilege Escalation, CVE & Kernel Exploits, Pivoting, RATs, MITM, Phishing, Social Engineering.
Defensive Security	SOC Operations, SIEM (Splunk, Wazuh), EDR, Snort, Wireshark, YARA, Network Traffic Analysis, Endpoint Monitoring, Cyber Threat Intel.
Forensics & Analysis	Digital Forensics (Autopsy), Malware Analysis, Keylogger Research, Browser/Mobile Hacking, Dark/Deep Web Research.
Languages	Python (Security Automation), Bash, C/C++, JavaScript, PowerShell, SQL.

KEY PROJECTS & SECURITY RESEARCH

Secure Full-Stack E-Commerce Application

- Developed a feature-rich application using **React, Node.js, and MongoDB** with integrated security headers and secure data models.
- Implemented advanced security measures including **Bcrypt** for hashing and **JWT** for session management; performed manual audits via **Burp Suite**.
- Engineered the system to withstand **OWASP Top 10** attack vectors, ensuring production-ready security from inception.

Enterprise Red Team vs. Blue Team Simulation

- Developed an end-to-end simulation featuring a **Windows Server AD** domain and a **Wazuh/Splunk** SIEM stack.
- Conducted full-chain attacks: Initial access via Phishing, Lateral Movement using **Pivoting**, and Domain Takeover.
- Implemented real-time detection rules and conducted post-incident forensic investigations using **Autopsy**.

Malware Analysis & Detection Engineering

- Analyzed custom **RATs** and **Keyloggers** in a sandbox environment to identify command-and-control (C2) patterns.
- Authored **YARA** and **Snort** signatures to detect malicious traffic and unauthorized credential exfiltration.

EDUCATION

B.Sc. in Computer Science & Engineering

Expected 2026

Shanto Mariam University of Creative Technology, Dhaka

Relevant Modules: Network Security, Cryptography, Secure Software Development, Digital Forensics

CERTIFICATIONS & ACHIEVEMENTS

- 🛡️ **PortSwigger:** Web Security Academy Practitioner (Hands-on Labs)
- 🛡️ **TryHackMe:** Specialized in Active Directory, Networking, Linux and Windows Fundamentals
- 🛡️ **Security Research:** Active Bug Bounty Hunter and CTF Participant
- 🛡️ **In Progress:** CompTIA Security+ and Certified Ethical Hacker (CEH)
